WEB APP DEVELOPER – PRICING ANALYTICS

Location: Toronto

Pricing Solutions Ltd. (www.pricingsolutions.com) is a consulting firm focused on helping its clients achieve a world class proficiency in Pricing. The company, established in 1993, distinguishes itself with its ability to develop effective pricing strategies to optimize profits and market share and its commitment to follow projects through to implementation.

PSL serves a wide range of clients in both B2C and B2B environments throughout North America and Europe with offices in Toronto, Boston, London, Singapore and Mexico City. PSL provides complete end to end coverage of pricing issues through our offerings.

Reporting to the VP of Analytics at Pricing Solutions, the **WEB APP DEVELOPER** will be supporting the team by leading the effort in tool and software development.

1. **Job Description**
    a. Technical Tasks
        - Design, develop and maintain pricing tools to be used by our clients
            o Examples of tools include but are not limited to, pricing simulators based on real-life transactional data and statistical modeling
        - Work closely with the VP of Analytics to understand the functional and system requirements, for both the back end and the front end of the tools
        - Lead the testing and debugging processes
        - Support the programming needs of PSL's other teams on an ad hoc basis
    b. Other Tasks
        - Participate in internal project meetings
        - Participate in client meetings on an ad hoc basis

2. **Qualifications**
    a. Minimum Requirements
        - Bachelor's or Master's degree in Software Engineering or Computer Science
        - Strong academic record from a top tier university
        - 3-5 years of work experience in software development
        - Expert level skills in web app programming (JavaScript, HTML, CSS)
        - Working knowledge of either Python or R (or both)

- At least basic knowledge of relational database management tools (SQL Server, Oracle, MySQL, etc.)
- Ready to start work and able to work legally in Toronto, Ontario, Canada
- Fluency in English. Other languages would be an asset

b. Nice to Have:
- Background in statistics, analytics, data science or machine learning
- Familiarity with Shiny apps
- Familiarity with data visualization tools (Tableau, QlikView, etc.)
- Familiarity with cloud computing, especially Amazon Web Services

c. Soft Skills:
- Highly Organized and Client-Oriented
- Able to manage multiple projects, communicate timelines, status, and meet timelines
- Able to balance smaller assignments and requests with larger projects
- Able to organize and maintain version control

This is a full-time position. Salary commensurate with experience.
